## OBJECTIVE

DevOps professional seeking to leverage CI/CD & cloud skills to automate workflows and improve efficiency. Eager to learn and contribute to a fast-paced DevOps environment.

## EDUCATION

**ENSA, Tetouan**                                                                September 2019 - July 2024
State Engineer in Computer Science

## SKILLS

| | | | |
|---|---|---|---|
| **CI/CD** | Docker, GitHub Actions | **Cloud Platforms** | AWS, Kubernetes |
| **Infrastructure as Code** | Terraform | **Scripting** | Bash, Python |
| **GitOps** | ArgoCD | **Monitoring** | Prometheus |
| **Version Control** | Git, GitOps | **Linux Administration** | |
| **Soft skills** | Communication, Collaboration | | |

## EXPERIENCE

**TrouveTaVoie, Paris (remote)**                                                February 2024 - July 2024
*DevOps & Cloud Engineer, PFE Internship*

- Streamlined deployments using reusable GitHub Actions workflows for a complex architecture on AWS leveraging Kubernetes.

- Significantly reduced deployment time and improved infrastructure consistency.

**FeverTokens, Paris (remote)**                                                June 2023 - September 2023
*Full Stack Developer, PFA Internship*

- Designed and implemented a Wallet as a Service (WaaS) solution to enhance the user experience and scalability of the Web 3.0 platform.

## PROJECTS

**Automated Deployment Pipeline for Web Application**

- Implemented Git for version control and code management.

- Set up a CI pipeline for automated builds and unit testing.

- Containerized the application using Docker and deployed to a cloud platform.

- Integrated basic application monitoring for performance insights.

## CERTIFICATIONS

- DevOps with Kubernetes (University of Helsinki & Unity)

- OCI Foundations (Oracle Academy)

- DevOps with Docker (University of Helsinki & Eficode)

- LFS169: Introduction to GitOps (The Linux Foundation)
